## Amendments to the Claims

1. (Currently Amended) A method of formatting data for populating a telecommunications switch, comprising the steps of:

downloading output-formatted data from the switch;

converting the output-formatted data to input-formatted data acceptable for input to the switch:

editing the input-formatted data, wherein the step of editing the input-formatted data includes adding new data to the input-formatted data according to a format of the input-formatted data, whereby the new data is NPA-NXX data;

transmitting the input-formatted data to the switch; and populating the switch with the input-formatted data.

2. (Original) The method of Claim 1, further comprising the step of opening a link between a first computing system and the switch; and

transmitting the input-formatted data to the switch via the link between the first computing system and the switch.

3. (Original) The method of Claim 2, wherein the step of opening a link between a first computing system and the switch includes opening a Telnet session at the first computing system; and

establishing a communications link for transmitting data to and from the first computing system and the switch.

4. (Original) The method of Claim 3, wherein the step of downloading output-formatted data from the switch includes the steps of:

launching a data formatting program on the first computing system; and opening a graphical user interface for receiving downloaded output-formatted data from the switch; and

copying the output-formatted data into the graphical user interface.

## 5. (Canceled)

- 6. (Original) The method of Claim 1, wherein the step of editing the input-formatted data includes the step of deleting data from the input-formatted data.
- 7. (Original) The method of Claim 1, wherein the step of transmitting the input-formatted data to the switch includes the step of transmitting the input-formatted data to a second switch.
- 8. (Original) The method of Claim 1, whereby the step of transmitting the input-formatted data to the switch includes the step of transmitting the input-formatted data to a plurality of switches.
- 9. (Original) The method of Claim 1, whereby the step of populating the switch with the input-formatted data includes the step of populating a second switch with the input-formatted data.
- 10. (Original) The method of Claim 1, whereby the step of populating the switch with the input-formatted data includes the step of populating a plurality of switches with the input-formatted data.

## 11. (Canceled)

12. (Original) The method of Claim 1, whereby the data includes routing information for call processing.

## 13-22. (Canceled)
